Good Morning Alice,

I am just checking in on this. I was wondering if it would be acceptable to send a letter requesting disposal of laboratory archived samples from the CSO/SWO Program.

Let me know,

Thanks

Subject: Tierra CSO Program Archived Samples

Good Morning Alice,

I wanted to reach out to you regarding analytical samples we have archived at the laboratories from the CSO Program. Per the attached EPA letter, EPA approval is needed to dispose of any samples from the CSO Program. Since the CSO Program is effectively terminated, I thought it would be acceptable to have the laboratories dispose of the CSO samples. My plan is to send you a letter depicting the SDGs/analytes which are in archive, and request disposal of said samples. Prior to doing so, I wanted to get your thoughts on this approach. Please let me know if this approach is acceptable.

Thanks
